● PROFILE

Developer with a hybrid background in **full-stack web development** and **data science**. After starting my tech career in Uruguay (2003–2010) as a programmer and IT technician, I relocated to Berlin and recently returned to coding through two intensive bootcamps: **Full-Stack Development (2023)** and **Data Science & Machine Learning (2026)**. I combine solid software engineering fundamentals with hands-on experience building end-to-end ML pipelines, REST APIs, and modern React applications. Trilingual and comfortable in international teams.

● FEATURED PROJECTS

FIFA World Cup AI Predictor

FINAL PROJECT · DATA SCIENCE BOOTCAMP

End-to-end ML pipeline predicting international football match outcomes from 150+ years of historical data (49K matches + FIFA rankings). Combines four ML/DL models with a Generative AI layer for natural-language analysis. Deployed as an interactive Streamlit app.

Stack: Python · pandas · scikit-learn · TensorFlow · OpenAI API · Streamlit

SYSO — Share Your Sketch

FINAL PROJECT · FULL-STACK BOOTCAMP

Social platform where users register, upload and share their sketches and artwork, comment on posts, and like other users' content. Built around full CRUD functionality, authentication, and image management.

Stack: MERN (MongoDB · Express · React · Node.js) · TypeScript · CSS
